Comprehension	READ THE PASSAGE BELOW AND ANSWER THE QUESTIONS: Despite the rapid proliferation of artificial intelligence across industries, there remains considerable skepticism about its capacity to emulate human creativity. While AI can synthesize vast data and mimic stylistic nuances, its output often lacks the unpredictability and emotional depth characteristic of genuine artistic innovation. Recent experiments in machine-generated literature and art have produced technically proficient results, yet critics argue these works are fundamentally derivative, echoing established patterns from human creators rather than originating new paradigms. Nevertheless, advocates insist that AI expands the boundaries of creativity, facilitating novel collaborations between humans and machines. Researchers point to hybrid projects that leverage algorithmic input as a catalyst for breakthroughs, suggesting a future where AI serves less as a replacement and more as an enhancer of human ingenuity. As the debate intensifies, questions persist on what constitutes truly original art and whether creative intuition can ever be programmed. Ultimately, the integration of AI into creative fields demands a reassessment not just of technology's capabilities but also of our definitions of artistry.
Question Description	According to the passage, why do critics regard AI-generated art as "fundamentally derivative"?
A	It often plagiarizes existing works
B	It replicates existing human patterns instead of creating new ones
C	It lacks any technical proficiency
D	It ignores stylistic nuances
E	None of the above
Correct Answer	B

Comprehension	READ THE PASSAGE AND ANSWER THE QUESTIONS: The phenomenon of language extinction presents a critical challenge to cultural diversity worldwide. Linguistic diversity encapsulates unique worldviews, traditions, and historical narratives intertwined within speech and expression. However, globalization and homogenizing forces of dominant languages continue to marginalize minority tongues, risking irreparable loss. Scholars argue that language preservation is not only about safeguarding words but also about protecting collective identities and knowledge systems rooted in indigenous languages. Revival efforts thus emphasize community participation, digital documentation, and intergenerational transmission to reinvigorate endangered languages. Despite advancements, practical challenges abound, including insufficient resources, political neglect, and urban migration patterns that detach younger generations from native idioms. Ultimately, the urgency lies in not just recognizing linguistic loss but mobilizing multifaceted strategies to preserve the tapestry of human expression for posterity.
Question Description	According to the passage, what does linguistic diversity encompass?
A	Economic progress

B	Unique worldviews and cultural narratives
C	Only words and grammar
D	Global business languages
E	None of the above
Correct Answer	B

Question Description

Exports and imports, a swelling favourable balance of trade, investments and bank-balances, are not an index or a balance sheet of national prosperity. Till the beginning of the Second World War, English exports were noticeably greater than what they are today. And yet England has greater national prosperity today than it ever had. Because the income of average Englishmen, working as field and factory labourers, clerks, policemen, petty shopkeepers and shop assistants, domestic workers and other low-paid workers, has gone up.

The passage best supports the statement that:

- | | |
|-----------------------|---|
| A | a country's economic standard can be best adjudged by per capital income. |
| B | a country's balance of trade is the main criteria of determining its economic prosperity. |
| C | a nation's economy strengthens with the increase in exports. |
| D | English trade has continually increased since the Second World War. |
